City:	
Country:	
Contact person:	
Mail:	
Telephone number:	

and

BroBizz A/S

1. About the agreement

Vehicles over 3.5 tonnes that are driving on the highways in Austria are required to pay fees with a specific type of OBE, e.g. the EasyGo+ BroBizz® transponder. The requirement applies to all such vehicles regardless of nationality.

EasyGo+ is a voluntary agreement concluded in addition to the customer's Private agreement with BroBizz A/S. You must have or will conclude a private agreement in order to conclude an EasyGo+ agreement.

2. Basis of agreement

This additional agreement constitutes the complete agreement between the parties together with the terms & conditions of BroBizz Private.

Without limitation, reference is made especially to Section 1.5, 1.7, 2.2, 2.3, 3.1, 3.2 and 7 of the terms & conditions.

3. Order of precedence

In case of conflict between this additional agreement and the BroBizz Private Agreement then the order of precedence shall be; this additional agreement, and thereafter the BroBizz Private Agreement.

4. One EasyGo+ BroBizz transponder - One vehicle (Personalisation)

The EasyGo+ BroBizz transponder covered by this additional agreement may solely be used for the vehicle with the specified registration number and with the specific classifications. Information about the EasyGo+ BroBizz transponders and vehicles etc. covered by this additional agreement are listed in exhibit 1 to the additional agreement.

BroBizz A/S wishes to make BroBizz® the obvious choice on roads in Europe. More than 620,000 customers already use BroBizz® as a means of payment when driving on toll roads, bridges and ferries in Scandinavia and Austria. BroBizz A/S was established in 2008 as part of the preparations for the European Electronic Toll Services Directive, which should ultimately enable motorists to pay with the same OBE, e.g. BroBizz®, on all toll roads in Europe. BroBizz A/S is part of the Sund & Bælt Group.

Pursuant to Section 1.7, the customer is responsible for ensuring that all information provided is correct and up to date. The customer undertakes to indemnify BroBizz A/S against all economic losses imposed on BroBizz A/S as a result of the errors or lack of updating by the customer.

5. Rights and obligations for EasyGo+

The customer must provide all necessary documentation to BroBizz A/S to ensure a correct personalisation of the EasyGo+ BroBizz transponder. This applies besides the vehicles registration number also to the nationality code, number of axles, Euro emission category documentation, European vehicle group and maximum admissible weight.

Furthermore, the customer must report a change of ownership of a vehicle to BroBizz A/S immediately.

Please note that the "Vehicle Declaration", a special certificate that is issued at the commencement of the agreement or changed by report of a change of ownership, **must** be carried in the vehicle when driving in Austria and be presented upon request.

Besides the risk that the customer may be charged for the same passage on multiple OBE's, the customer also risks being charged for the passage of the next vehicle in the same lane and a fine if no OBE is registered for the passage, if Section 2.2 regarding installation of the EasyGo+ BroBizz transponder or Section 2.3 regarding multiple transponders in the vehicle has been violated.

For that reason the driver should therefore also pay attention to the acoustic signals emitted by the BroBizz+ transponder signalling whether payment has been confirmed and act upon the directions found in the "Instructions to the truck drivers" (See exhibit 2).

Finally, BroBizz A/S draws your attention to the fact that there may be set other terms and conditions for the passage of toll roads etc. in Austria and that it is the responsibility of the customer to acquaint himself with these. At www.brobizz.com and www.easygo.com, the customer can find a list of operators together with links to their websites at any time.

Driver instructions for using the EasyGo+ BroBizz® in Austria

You now have an EasyGo+ BroBizz transponder for your vehicle that you can use on toll roads in Austria, Denmark, Sweden and Norway. Below you will find some information about the installation and use of your EasyGo+ BroBizz transponder. This is however only a part of the overall requirement and principles for using the EasyGo+ service and for using toll roads in Austria, so please also refer to the other information from BroBizz A/S and the requirement from ASFINAG, which can be found on www.Asfinag.at

Main rules

The main rules when driving in Austria are:

- Install the EasyGo+ BroBizz transponder correctly on the windscreen – see attached installation instructions A, B, C and D
- Set the number of axles - see attached installation instructions F
- Ensure that the licence plate number associated with the EasyGo+ BroBizz transponder is correct (stated in the "vehicle declaration")
- Ensure that the EURO emission category associated with the EasyGo+ BroBizz transponder is correct (stated in the "vehicle declaration")
- Ensure that you pay attention to the acoustic signals – see below and attached installation instructions H
- Ensure that the "vehicle declaration" is always kept in the vehicle as this must be presented on request. If you have any questions after having read the information concerning the EasyGo+ BroBizz transponder, please contact
- BroBizz A/S, phone +45 70207049, or email EasyGo+@BroBizz.dk

The EasyGo+ BroBizz transponder emits acoustic signals

Pay attention to the acoustic signals (beeps) when driving on the Austrian toll road network. In case of irregularities (no beeps) and or non-payment (no beeps or 4 beeps) you have to contact the nearest "GO Point of sales" where you have to pay the toll retroactively (within 5 hours and 100 km) and where you can receive a "local" Austrian GO-Box before continuing your journey in Austria.

The EasyGo+ BroBizz transponder emits acoustic beeps when passing charging points in Austria:

- 0 Beeps = Something is wrong. A retroactive (manual) payment is possible at a "GO Point of sales" within 100 km and 5 hours.
- 1 Beep = The transaction is confirmed on basis of the stored data (emission category, licence plate...) and the set number of axles
- 4 Beeps = Something is wrong. A retroactive (manual) payment has to be made at a "GO Point of sales" within 100 km and 5 hours.

IMPORTANT: You must react immediately and contact a 'Go Point of Sales' within the timeframe and distance stated above, when there are no beeps and when there are 4 beeps. Otherwise you will risk penalties.

"GO Points of sales" are located all over the Austrian motorways and on the main routes to Austria in the neighbouring countries. See the sign below.
